

Indirect NFC-Login

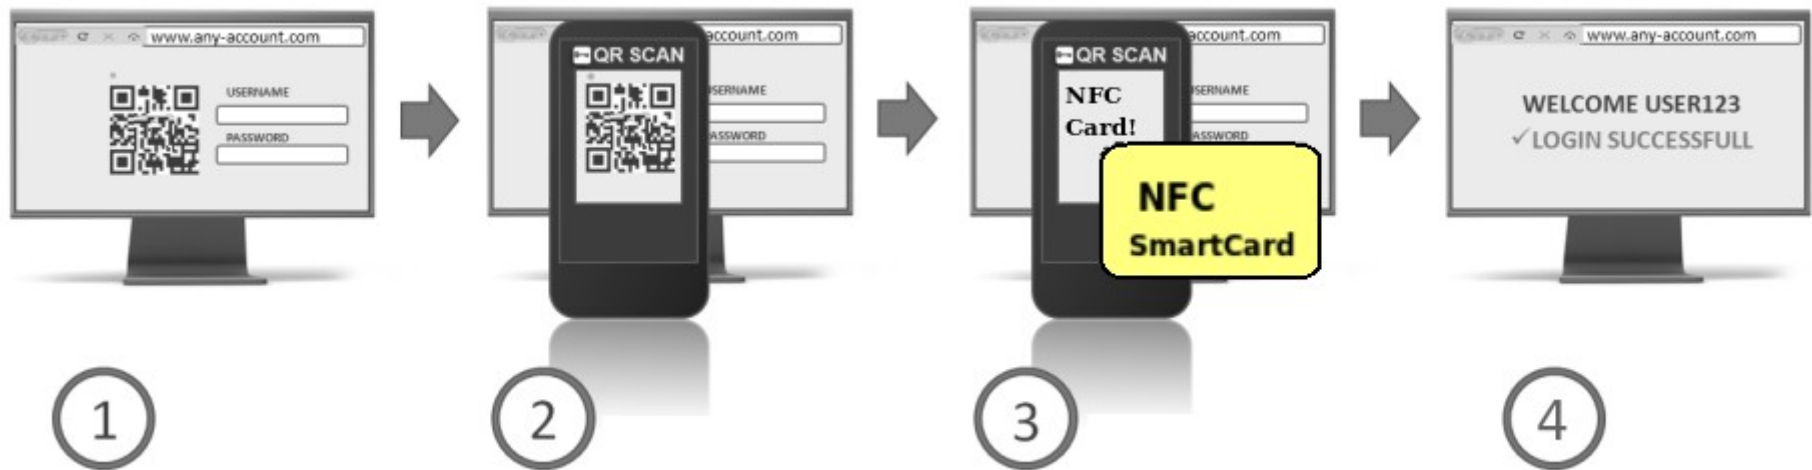

Bernd Borchert, Max Günther

Univ. Tübingen, Germany

Direct NFC-Login

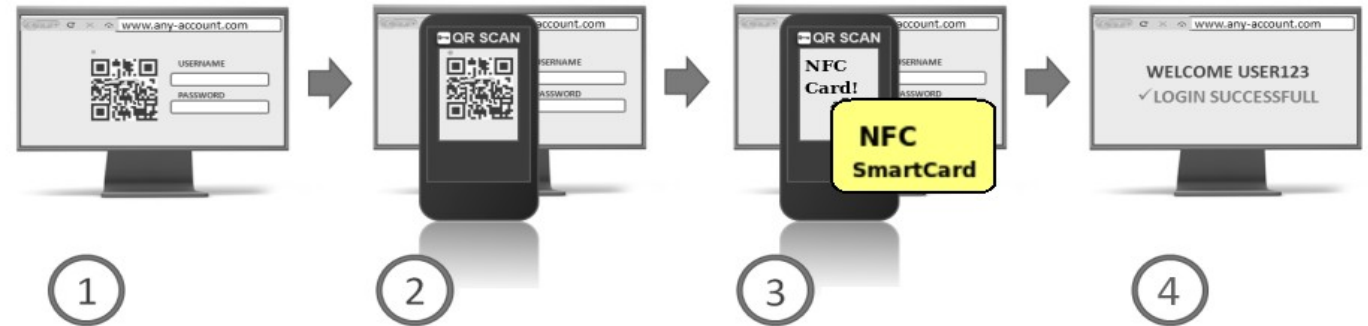

Indirect NFC-Login

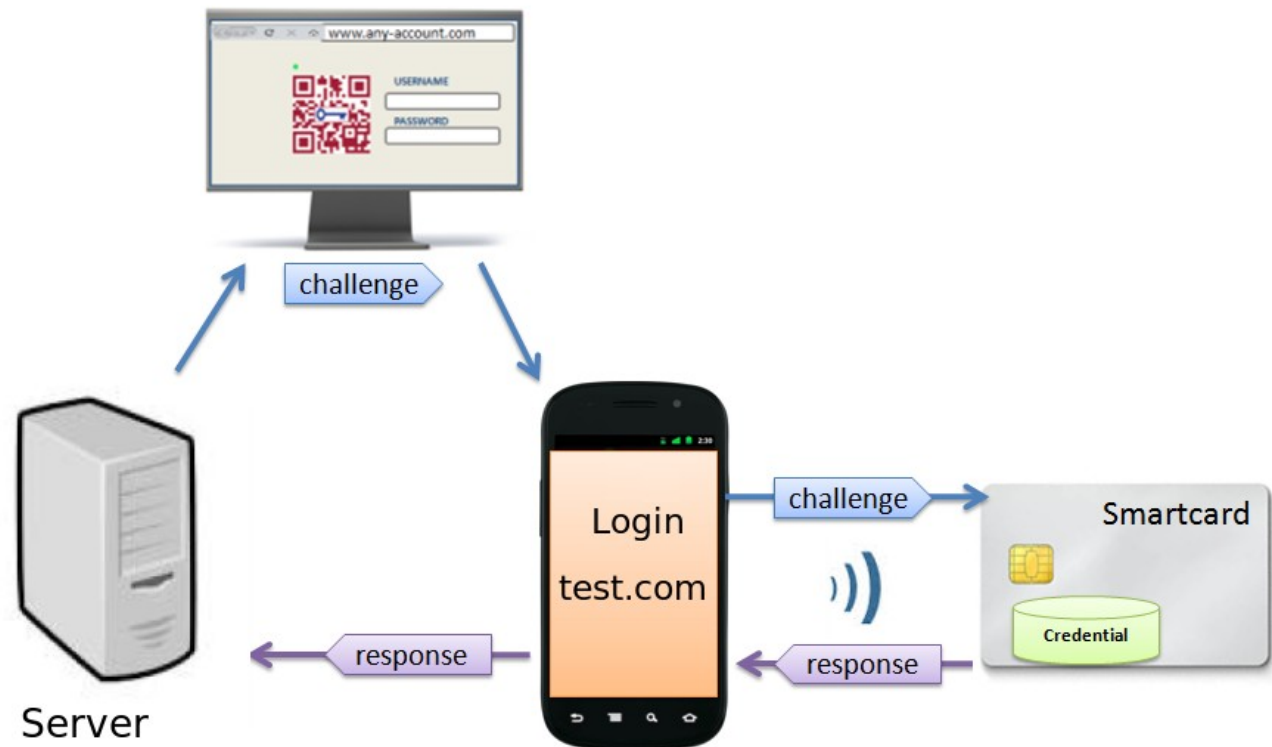

Advantage: No NFC necessary on the PC

How does Indirect NFC-Login work?

User's perspective:

In the background:

Smart Login vs. Indirect NFC-Login

Smart Login (= Smartphone Login):

Demo Smart Login: <http://www.ekaay.com/>

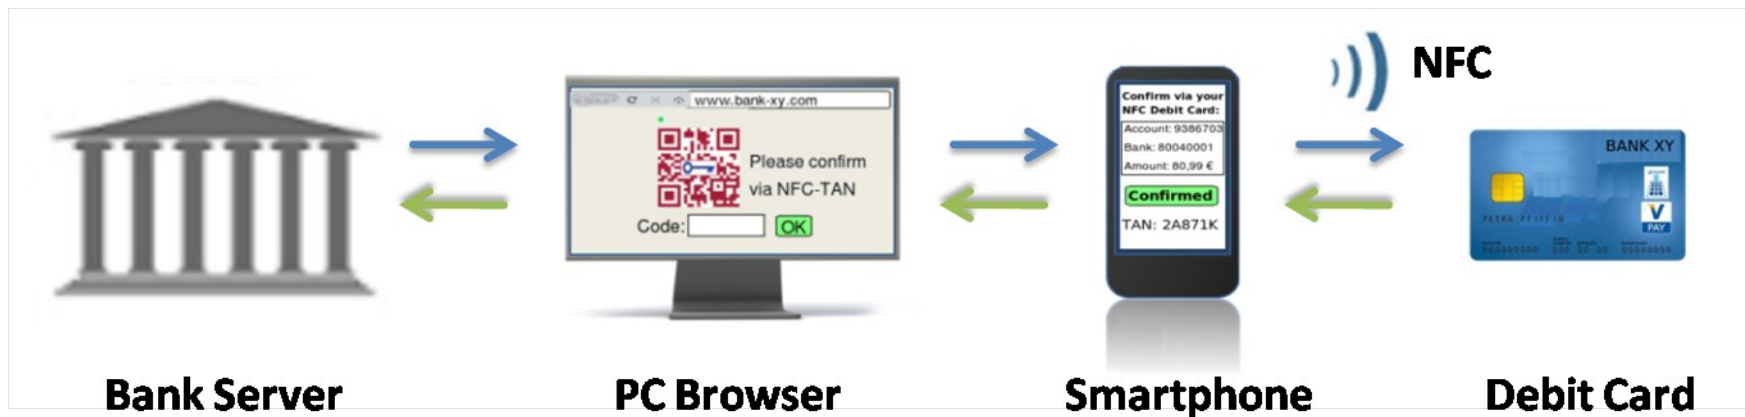

Advantage Smart Login: Usability

Advantage Indirect NFC-Login: Security

In case the portal users have already cards (enterprise, university, car rental) the Indirect NFC-Login may be preferable in terms of both security and usability.

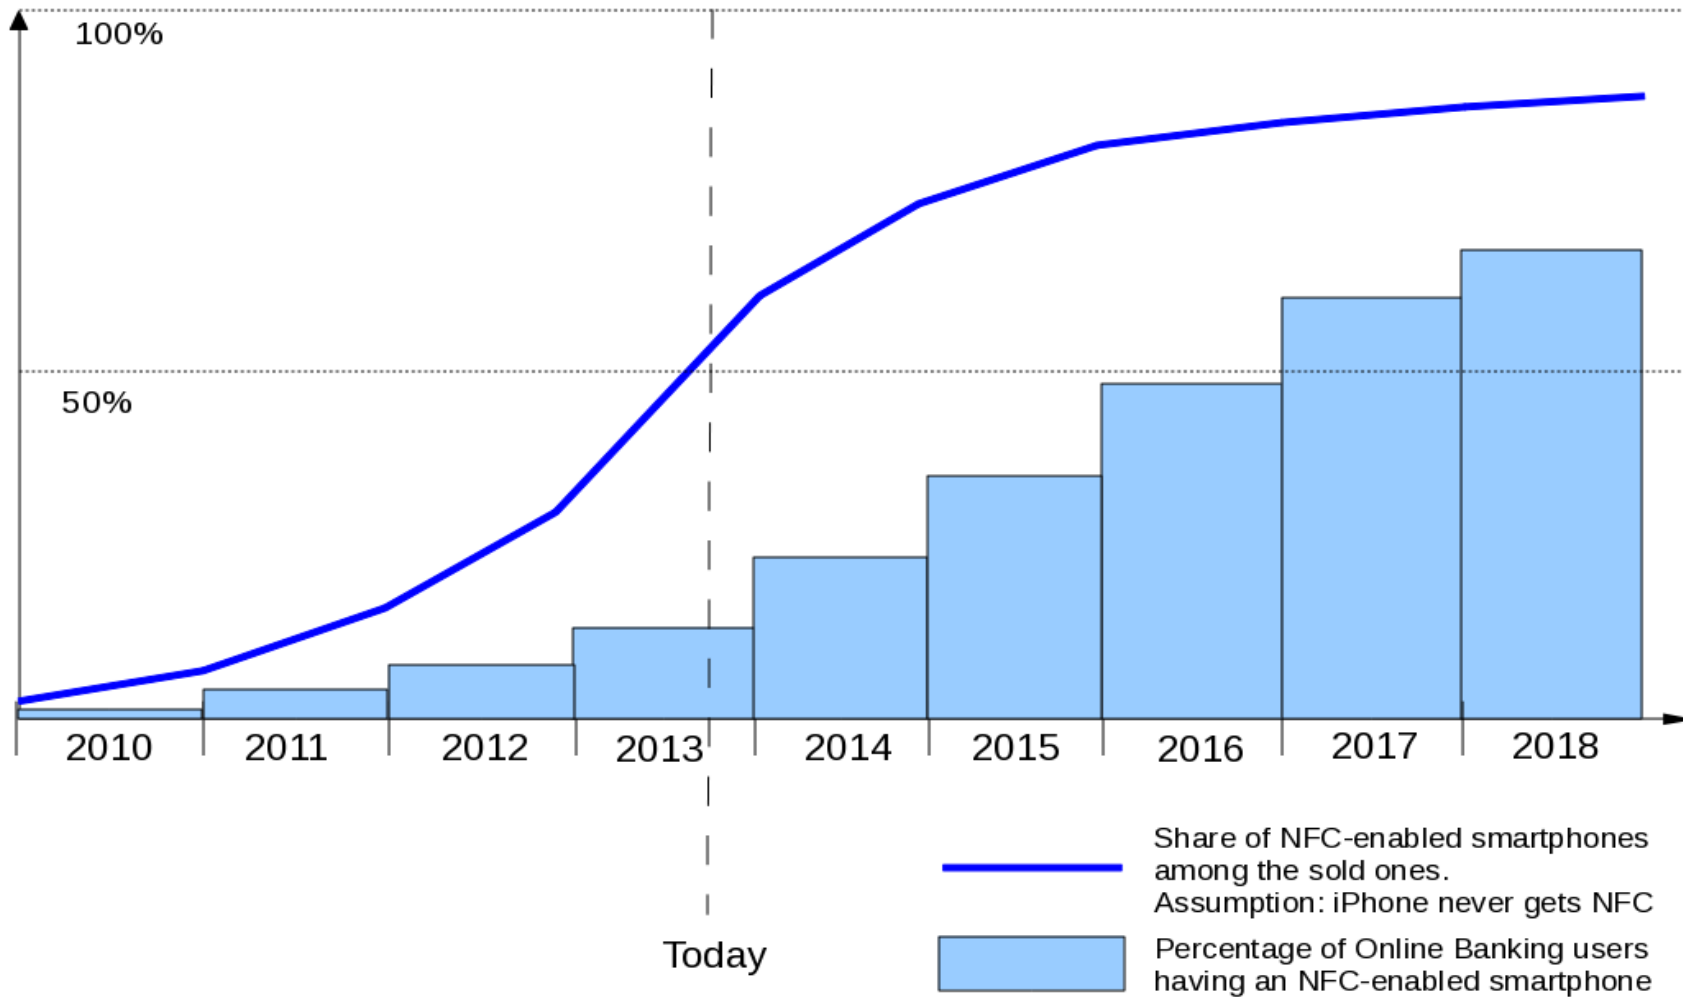

NFC-TAN

NFC-TAN is the Transaction-signing analogue of NFC-Login

Demo NFC-TAN: <http://www.nfc-tan.com/index-en.html>

Availability NFC-Smartphones

Summary

- Indirect NFC-Login may help the Direct NFC-Login to overcome the problem that most PCs don't have NFC, while many Smartphones already have.
- In their combination they may replace the username/password method:

On NFC-PC: Direct

On Smartphone: Direct

On non-NFC PC: Indirect
